Single Rail Car Derailment, Long Beach, Los Angeles County, Hazardous Material Spill Report #17-3670

On 05/25/17 at 0151 hours the California State Warning Center (CSWC) received a report from Union Pacific Rail Road (UPRR) advising that a single rail car (Non Hazardous Plaque) had derailed upright due to it traveling over a derail device in their railyard.

- There was no hazardous release and no injuries to crew.
- Crews responded to the scene to re-rail the car.
- CSWC personnel performed notifications per SOP.

Two Rail Car Derailment, Bloomington, San Bernardino County, Hazardous Material Spill Report #17-3671

On 05/25/17 at 0230 hours the California State Warning Center (CSWC) received a report from Union Pacific Rail Road (UPRR) advising that a two cars derailed upright in their railyard during operations due to crossed draw-bars. Both cars contained lumber at the time of the incident.

- There was no hazardous release and no injuries to crew.
- Crews were responding to the scene to re-rail the cars.
- CSWC personnel performed notifications per SOP.

- See 2017 Statewide Winter Storms Slides

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will re-open.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Solano County: Sacramento River at Rio Vista

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Mariposa County:

- Merced River at Yosemite at Pohono Bridge is forecast to be at flood stage at 10.1 feet the morning of 05/25/17 and is receding.
 - Potential Impacts: Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Placer County: Truckee River at Truckee
- Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

Cal OES Southern Region

River Forecast - The following river is forecast to meet or exceed Flood stage:

Mono County:

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.1 feet the morning of 05/25/17 and is receding.
 - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

WEATHER OF CONCERN

Weather of Concern

- A weak trough of low pressure will produce gusty winds and light showers for portions of mountainous and desert areas of Southern California.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

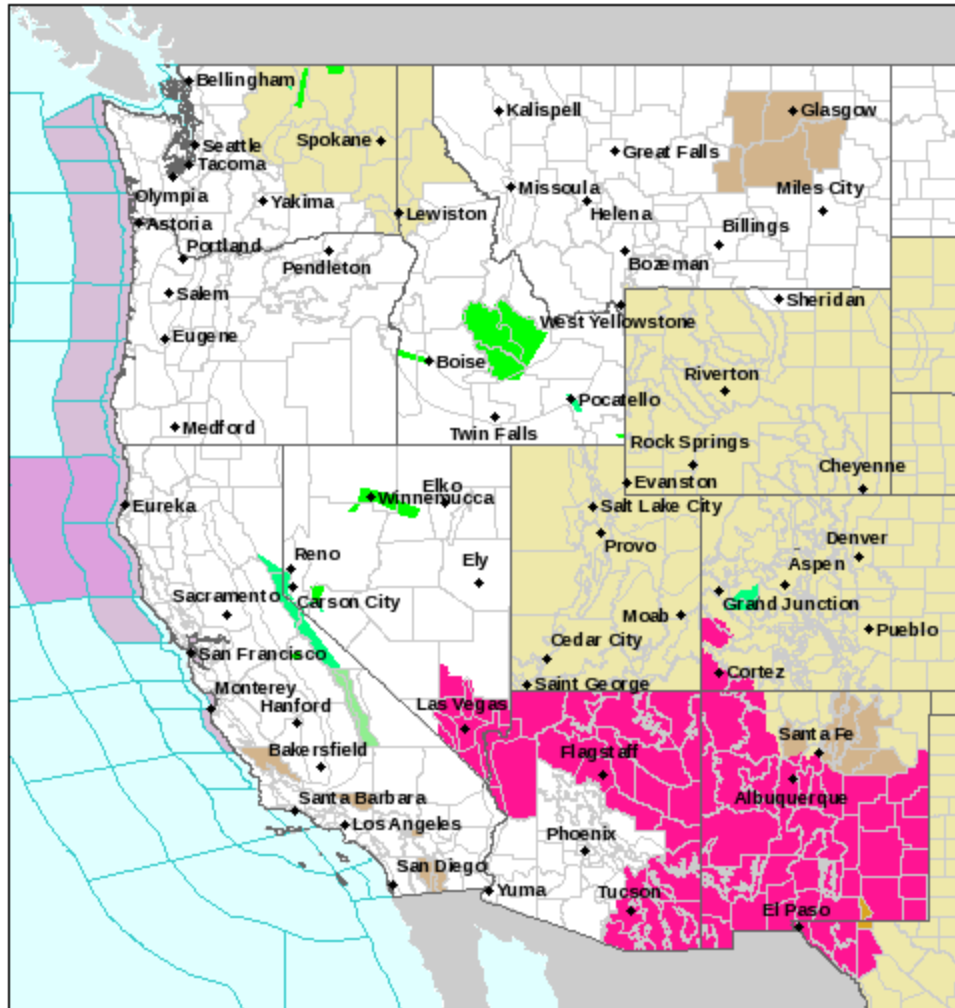

A trough will be overhead today. Cooler temperatures, slightly higher relative humidity (RH), and gusty Southwest-Northwest winds are expected. High pressure will return by late tomorrow and produce a warming trend through Sunday. However, there will still be afternoon buildups and a slight chance of showers or thunderstorms over the higher terrain each day. By Memorial Day the ridge will move off to the east and a Pacific low pressure trough will approach the area, bringing a cooling trend with breezy conditions. Afternoon shower and thunderstorm chances will continue.

SOUTHERN CALIFORNIA

Breezy and cooler through Friday

A trough over the Pacific Northwest will lead to increasing onshore flow and cooler weather over the next few days. Look for a deepening marine layer which will lead to increasing coverage of night and morning stratus through today. Some mid level moisture will allow for some morning showers to develop just off the central coast as well as afternoon convection in the Sierras. Today and Friday, clearing will be very limited along the coast and some interior valleys, and as a result, high temperatures outside the desert will only be in the 70s to lower 80s with much higher RH during the afternoon. Onshore pressure gradients will become quite strong later this week, leading to west and southwest winds of 20-30 mph with gusts to 50 mph near the Kern County Mountains, the Antelope Valley and central Mojave and the Banning Pass toward the Coachella Valley. This weekend, high pressure is expected to rebuild over the area. Temperatures by Saturday and Sunday will be quite warm (but not as hot as last weekend) with lower 90s common in the valleys. The atmosphere will be a bit more unstable this weekend, which may lead to isolated afternoon wet thunderstorms near the Sierra Crest Saturday through Monday. Winds will be light over the weekend and marine layer coverage will be limited to the immediate coast.
